

# HEP C TREATMENT HAS CHANGED!

## HEPATITIS C IS...

### Easy to get

You get hep C from blood-to-blood contact.

Don't share:

- Fits
- Tattoo guns and ink
- Hair clippers
- Toothbrushes and razors

### Easy to test

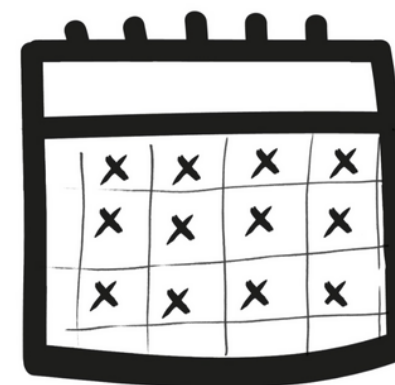

Put in a request form to Medical

- The nurse will do a blood test and get you ready for treatment

### Easy to treat

- Tablets for 8 to 12 weeks
- Take your tablets everyday
- NO injections!
- 95% chance of being cured
- Doesn't make you sick
- Treatment is available in prison and in the community.

#### **STARTED TREATMENT BUT GETTING RELEASED?**

- Talk to the hep C nurse as soon as you know
- You will get your meds to take home
