

HEP C TREATMENT HAS CHANGED!

HEPATITIS C IS...

Easy to get

You get hep C from blood-to-blood contact.

Don't share:

- Fits
- Tattoo guns and ink
- Hair clippers
- Toothbrushes and razors

Easy to test

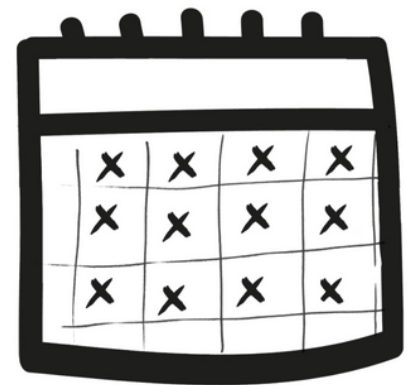

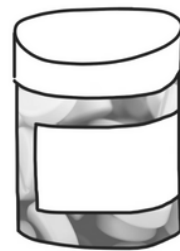

Put in a request form to Medical

- The nurse will do a blood test or fingerstick test and get you ready for treatment

Easy to treat

- Tablets for 8 to 12 weeks
- Take your tablets everyday
- NO injections!
- 95% chance of being cured
- Doesn't make you sick
- Treatment is available in prison and in the community.

STARTED TREATMENT BUT GETTING RELEASED?

- Talk to the hep C nurse as soon as you know
- You will get your meds to take home

PUT IN A REQUEST FORM TO
MEDICAL FOR A HEP C TEST
